

PRODUCT DISINFECTION GUIDE

DRUMS

INTRODUCTION

This guide contains the latest information on enhanced cleaning and disinfection methods that differ from ordinary cleaning. Some information may also differ from existing user manuals. The methods listed may influence the external appearance of the product, which depends on the compatibility of each product part and the cleaning/disinfecting material. Please note that the information in this guide does not guarantee complete disinfection of products, and users are encouraged to consult EPA guidance and utilize EPA-approved products to perform disinfection on their own.

HOW TO USE THIS GUIDE

The first section of this guide describes the recommended disinfection methods. The sections that follow assign the best method(s) for specific parts of the product.

NOTES FOR RETAILERS AND SCHOOLS

For demonstration instruments, please carry out disinfection after each use. Please avoid sharing instruments involving close contact such as mouthpieces. In schools, we recommend that each student purchase their own mouthpiece.

- 1

NEUTRAL DETERGENT WITH SURFACTANT

For products that can be disinfected using neutral detergent, compatability with the product has been confirmed up to a maximum concentration 0.32% of mixed solution, Alkylamine oxides and Polyoxyethylene alkyl ether.
- 2

SODIUM HYPOCHLORITE

For products that can be disinfected using sodium hypochlorite, compatability with the product has been confirmed up to a maximum concentration 0.5% solution.
- 3

ETHANOL

For products that can be disinfected using ethanol, compatability with the product has been confirmed up to a maximum concentration 80% solution.

DRUMS

- 1

NEUTRAL DETERGENT WITH SURFACTANT | METAL PARTS

Wipe with a soft cloth that has been moistened with the solution and thoroughly wrung out.

Leave for 5 minutes.

Wipe with a soft cloth that has been moistened with water and thoroughly wrung out.

Wipe off any moisture with a dry cloth.

* Use a soft cloth and be careful to not cause scratches by excessive rubbing. Be careful to not allow water to drip into the product interior. Also, wipe thoroughly so that no solution or water remains.
- 1

NEUTRAL DETERGENT WITH SURFACTANT | DRUM STOOL

Wipe with a soft cloth that has been moistened with the solution and thoroughly wrung out.

Leave for 5 minutes.

Wipe with a soft cloth that has been moistened with water and thoroughly wrung out.

Wipe off any moisture with a dry cloth.

* Use a soft cloth and be careful to not cause scratches by excessive rubbing. Be careful to not allow water to drip into the product interior. Also, wipe thoroughly so that no solution or water remains.
- 1

NEUTRAL DETERGENT WITH SURFACTANT | STICKS (Oak)

Wipe with a soft cloth that has been moistened with the solution and thoroughly wrung out.

Leave for 5 minutes.

Wipe with a soft cloth that has been moistened with water and thoroughly wrung out.

Wipe off any moisture with a dry cloth.

* Use a soft cloth and be careful to not cause scratches by excessive rubbing. Be careful to not allow water to drip into the product interior. Also, wipe thoroughly so that no solution or water remains.
- 1

NEUTRAL DETERGENT WITH SURFACTANT | STICKS (Hickory, Rosewood)

Wipe with a soft cloth that has been moistened with the solution and thoroughly wrung out.

Leave for 5 minutes.

Wipe with a soft cloth that has been moistened with water and thoroughly wrung out.

Wipe off any moisture with a dry cloth.

* Use a soft cloth and be careful to not cause scratches by excessive rubbing. Be careful to not allow water to drip into the product interior. Also, wipe thoroughly so that no solution or water remains.

Note: The US Environmental Protection Agency regulates disinfection products and maintains a list of disinfectant products that are approved for use against SARS-CoV-2. This list can be accessed at the following url: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2-covid-19>
